## Practice little bit everyday

Fun features motivate the students to continue learning. Students can collect flags and fishes by proceeding with their learning.

### Learning Output

SoroTouch class will give children chances to output their daily learning. It will help children to build confidence and perform their skills. Activities will be adapted to each of their levels.

Output once a week

Connect with center system

## Learn together with friends!

Center class provides an environment for children to share the excitement of learning and development with friends.

### Fun Activities

There are more than 20 types of games children can play including group activities. With SoroTouch, calculation can become fun like sports. It can also help children develop their self-regulation through cooperation, communication, and numeracy.

### Motivation Support

Different levels of students can learn together in one class at the SoroTouch center which helps children to self-motivate to learn more. Also, the Facilitator at the center will be a great motivation for the children.

### Individualized Learning

Each student will learn with an individualized curriculum. This allows children to merge with other students from different levels, which gives them chances to children to build not only self-confidence but also motivates them to have self-learning habits.

## Tuition

Have fun while learning in a group!

Enrollment Fee

**\$20**

Total Monthly Tuition

**\$100**

Center learning once a week  
+  
Everyday 30min learning at home
